'Training Topics' on ATN

Can't find what you're looking for on ATN? The ATN team has created a 'Training Topics' page with 'packaged' subjects like Pre-Deployment Training, Cultural Awareness training, Leader Development and much, much more. The intent is to put 'best-in-class' training resources in one place – so you don't have to hunt for them. You can get to the Training Topics page from What's Hot. Soon we'll have a logo on the homepage to help you get there even faster.

Traumatic Brain Injury (TBI)

Traumatic brain injury (TBI) is a significant health issue that affects service members and veterans during times of both peace and war. The high rate of TBI and blast-related concussion events resulting from current combat operations directly impacts the health and safety of individual service members and subsequently the level of unit readiness and troop retention. ATN has links to TBI training resources (What's Hot and Training Topics). You can also go to the Defense and Veterans Brain Injury Center (DVBIC) website for more information and resources.

New Brigade Combat Team Counterinsurgency Seminars

The U.S. Army Counterinsurgency Center is conducting pre-deployment counterinsurgency (COIN) training for Brigade Combat Team leaders. The focus of the seminar is to ground units in COIN, insurgency, operational environment, and the theater campaign plan to prepare them to conduct counterinsurgency in full spectrum operations in the Afghan theater. Units are encouraged to schedule COIN Seminars at the beginning of their ARFORGEN cycle during FORSCOM scheduling conferences. The classes will be offered at the U.S. Army Combined Arms Center, Fort Leavenworth, Kan. For more information, contact the COIN Center at COIN@conus.army.mil or visit the COIN Center Website.

Unit Training Management (UTM)

In the works now, Unit Training Management (UTM) will replace all the training management processes and features on ATN. In addition to replacing the Training Management (TM) feature on ATN, it is also the direct successor to FM 25-101 and FM 7-1 (Battle-Focused Training). UTM's focus is on the how-to of: Mission Essential Task List (METL) Development, Long-Range Planning, Short-Range Planning and Assessments. *Stay tuned*!

DTMS Performance Survey

Continue to share your feedback on DTMS response times. Sign in to the survey tool to record the time to perform five one-step DTMS functions. Frequent data from multiple locations will help pinpoint and correct response time issues.

NEW personnel management capabilities in DTMS: Assign, Attach, Detach, and Exclude. Check out the detailed explanations in June 2011 Release Notes in the DTMS Knowledge Base> Download>Updates and Releases folder.

Help Desk FAQ of the week: *How can I get a Soldier who is no longer assigned to my unit removed from DTMS*? You'll find detailed instructions in the DTMS Knowledge Base> Download>Tutorials folder.

How-to for leaders: Be sure to see the downloadable **Leaders Guide to DTMS** under What's Hot on ATN.

More to come: Check this section each month for the latest frequently asked "*How do I...*" question from DTMS.
